REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Bell et al. (U.S. 4,031,829) shows an overhead conveyor with elongate box girders tat define a first space with rails and a second space with an endless drive element, a drive carriage with front and rear carriers each of which is provided with a driver preloaded towards engagement with the drive elements, guide rails arranged to cooperate with projecting portions of the rear carrier to move it out of engagement with the drive means, and a depressing means on the rear carrier that is adapted to cooperate with the projecting portion of the front carriage to move the front driver out of engagement with the driving means. However, the drivers are not friction drivers frictionally engaging the endless drive element as required by the independent claim and the projecting portions of the drivers are not located on a lower part of all of the drivers so that they may cooperate with a guide means as required by the independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Information Disclosure Statement

2. The information disclosure statement filed January 19, 2006 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.
